

CHALLENGES IN COMPUTING

Simula 10th Anniversary

Simula celebrates its 10 first years, and we are pleased to invite you to attend the anniversary conference Challenges in Computing on 14 and 15 December 2011.

In the conference, Simula wants to focus on future challenges in our research fields, by letting world leading scientists and technologists share their visions and their thoughts on what the next decades might bring.

The event will take place at Simula Research Laboratory, Fornebu. Please find full list of speakers, program and registration details on <http://simula.no/about/challenges>
We appreciate your registration by 1 November 2011.

PROGRAM:

Professor Aslak Tveito (Welcome)
Managing Director, Simula Research
Laboratory

Tora Aasland (Opening)
Norwegian Minister of Research and
Education

Professor Keith Marzullo
University of California San Diego, and
Division Director, National Science
Foundation

Professor Bashar Nuseibeh
The Open University, and Lero - the Irish
Software Engineering Research Centre

Professor Martin Shepperd
Brunel University

Professor Paola Inverardi
University of L'Aquila

Professor Alfio Quarteroni
École Polytechnique Fédérale de
Lausanne, and Politecnico di Milano

Professor Natalia Trayanova
Johns Hopkins University

Professor Omar Ghattas
University of Texas at Austin, and the
KAUST-UT Austin Academic Excellence
Alliance

Dr. Heinrich Stüttgen
Vice president of NEC Laboratories
Europe

**Announcement of the winner of the
Springer Computational Science and
Engineering Award 2011**
